# **PRESS RELEASE**

For Immediate Release  
Sept.18, 2017

## **Unemployment Rates Declined in the Metro Areas in August**

CARSON CITY, NV —Unemployment rates were down in all of the state's major population centers, both on a month-over-month and year-over-year basis in August. In Las Vegas, the unemployment rate is at 5.2 percent, down 0.2 of a percentage point from July, and down 0.5 of a percentage point from August 2016. Reno's unemployment rate is at 4.1 percent, down 0.1 of a percentage point from July and down 0.6 of a percentage point from last year. The unemployment rate in Carson City dropped 0.2 of percentage point over the month to 4.7 percent, a decline of 0.9 percentage point over the year.

Metro area rates are not adjusted for seasonality, which explains why the statewide rate reported last week rose slightly, while the metro area rates declined, said Bill Anderson, chief economist for Nevada's Department of Employment, Training and Rehabilitation.

"The Silver State continues to show positive results with the decline in the unemployment rates for the metro areas and positive job growth," Anderson said. "Employers are showing confidence in the economy by adding more jobs, while more people are joining the workforce in search of jobs."

### **KEY POINTS**

- The State added 38,800 jobs relative to August 2016, a 3 percent growth rate.
- Las Vegas added 28,400 jobs over the year, a 3 percent growth rate.
- Reno added 4,200 jobs over the year, a 1.9 percent growth rate.
- Unemployment rates were down in all of the State's major population centers, both on a month-over-month and year-over-year basis in August.
- All counties remain below 7 percent unemployment in August.

### **ABOUT THE RESEARCH AND ANALYSIS BUREAU**

The Research and Analysis Bureau is Nevada's premier source for labor market information. A part of DETR, the Bureau is responsible for creating, analyzing, and reporting Nevada's labor market information, in cooperation with the United States Bureau of Labor Statistics

(BLS).

DETR is comprised of the Employment Security Division, Equal Rights Commission, Rehabilitation Division, and the Research and Analysis Bureau. DETR oversees the Nevada JobConnect System to provide training and job placement services to job seekers and to assist employers in hiring practices. It also supports economic development efforts through improving Nevada's workforce.

## NEVADA SUB-STATE LABOR MARKET OVERVIEW

### August 2017

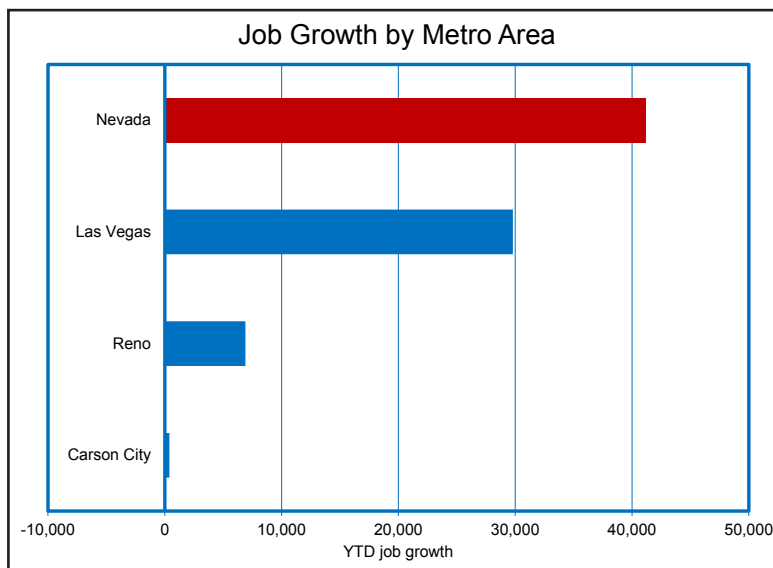

Job numbers remained strong throughout the Silver State in August with growth heavily concentrated in the Las Vegas metropolitan statistical area (MSA). Las Vegas employment saw a seasonally-adjusted increase of 4,200 jobs relative to July, the result of increasing by 5,600 jobs when only 1,400 were expected to be added. Reno employment remained steady as actual job gains matched the expected seasonal increase of 1,100. Carson City saw a slight sea-

**Nevada Nonfarm Jobs: July - August Change**

	Unadjusted Change	Expected Seasonal Movement	Seasonally Adjusted Change
Las Vegas	5,600	1,400	4,200
Reno	1,100	1,100	0
Carson City	0	-100	100

sonally-adjusted gain of 100 jobs, the result of realizing no change in employment when 100 jobs were expected to be lost.

Year-over-year employment increased or remained neutral across the State's MSAs this month. The State as a whole has added 38,800 jobs relative to August 2016, a growth rate of three percent. Las Vegas has gained 28,400 jobs over the year, also resulting in a growth rate of three percent. Specifically, goods-producing industries added 11,800 jobs to payrolls while service-providing industries added 18,500<sup>1</sup>. In Reno, 4,200 jobs were added over the year, corresponding to a growth rate of 1.9 percent. That area saw an increase

<sup>1</sup> References to total MSA employment are adjusted for seasonality, whereas references to goods-producing and service-providing industries are not.

of 1,800 goods-producing jobs and 3,300 service-providing jobs. A flat growth rate in Carson City resulted in employment numbers remaining unchanged from last August.

The Quarterly Census of Employment and Wages (QCEW) Program publishes the most accurate, albeit less-timely, measure of jobs. It represents a comprehensive count of employment based on information reported by all businesses covered under the Unemployment Insurance System, but is not available until several months following the end of a calendar quarter. As such, QCEW is the principal source of benchmark data for the more timely Current Employment Statistics (CES) monthly estimates--which are revised at the end of every calendar year.

The most recent QCEW information shows that total employment in Nevada as a whole increased 3.5 percent over the first three months of the year, relative to the same period in the preceding year. This translates into a gain of 43,700 jobs.

Job growth ranged from -1.2 percent in Lincoln County to 44 percent in Storey County. In the latter, 2,600 new jobs were generated over the year, leaving employment at 8,700. Construction leads the way with just over 1,000 new jobs. Gains were con-

centrated in the special trades.

As for Nevada's major population centers, Washoe County, at 2.9 percent, falls slightly below the Statewide average. Clark County experienced a growth rate nearly identical to that for the Silver State, at 3.5 percent. Finally, Carson City experienced a 3.4 percent growth rate.

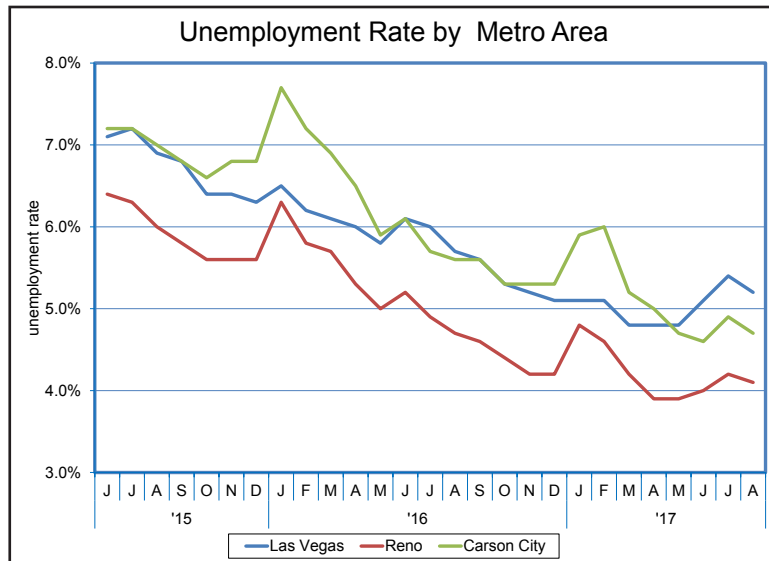

2017:IQ QCEW information shows employment in firms with less than 100 employees (our definition of "small business") accounted for 53.2 percent of total private sector employment in Nevada. Small business establishments account for more than half of total employment in 12 of 17 counties.

The lowest rate is in Eureka, at eight percent. This is attributable to large mining operations in the County. In Esmeralda and Lincoln counties, 100 percent of employment is in establishments with less than 100 employees in the absence of any large employers in these counties.

As for Nevada's major population centers, in Clark County, exactly half of employment is accounted for by small business, slightly below the Statewide average. Small business shares in Carson City (75 percent) and Washoe County (62.1 percent) are both higher than in the State as a whole.

Information from QCEW also shows Nevada wages averaged \$931 per week, as of 2017:IQ. Weekly wages range from \$690 (Lincoln) to \$2,170 (Eureka). Six counties have payrolls above \$1,000 per week. This can be attributed to the high concentration of mining jobs in these counties as a whole. As for Nevada's major population centers, wages come in just below the Statewide average. Carson City wages totaled \$905 per week during the first three months of the year. Clark County and Washoe County come in at \$922 and \$910, respectively.

Average weekly wages in Nevada as a whole increased 6.4 percent over the first three months of 2017, relative to the same period in 2016. Changes in weekly wages range from -2.6 percent (Esmeralda) to 25.5 percent (Storey). In the latter, growth is being driven by construction and manufacturing. Fifteen of 17 counties experienced an increase in average weekly wages in this year's first quarter. As for Nevada's major population centers, both Clark County (6.5 percent) and Washoe County (6.7 percent) saw wage increases greater than in the Silver State as a whole. Wages in Carson City grew 6.3 percent.

ment base in Nevada's 17 counties, providing insight into commuting patterns and the structure of the State's labor markets.

The Census Bureau's Longitudinal Employer-Household Dynamics (LED) On the Map tool allows for the analysis of worker inflows/outflows comprising the employ-

More than 80 percent of workers in major population centers live in the county of work. In Clark, 94 percent of the workforce resides in the County (821,500 of 875,000 workers). In Washoe, 81 percent (158,400) of workers reside in the County.

Unemployment Insurance Initial Claims By County			
	August 2017 (Year-to-Date)		Change
	2017	2016	
Clark	75,660	78,937	-3,277
Washoe	11,574	12,509	-935
Carson City	1,542	1,877	-335
Elko	986	1,208	-222
Douglas	935	1,151	-216
Lyon	1,625	1,810	-185
Humboldt	339	476	-137
Churchill	529	665	-136
Nye	940	1,056	-116
Lander	102	217	-115
Mineral	110	134	-24
Lincoln	62	84	-22
Pershing	83	102	-19
White Pine	178	196	-18
Eureka	23	32	-9
Esmeralda	25	26	-1
Storey	58	39	19

\*County level totals are not directly comparable to Statewide monthly totals due to reporting differences.

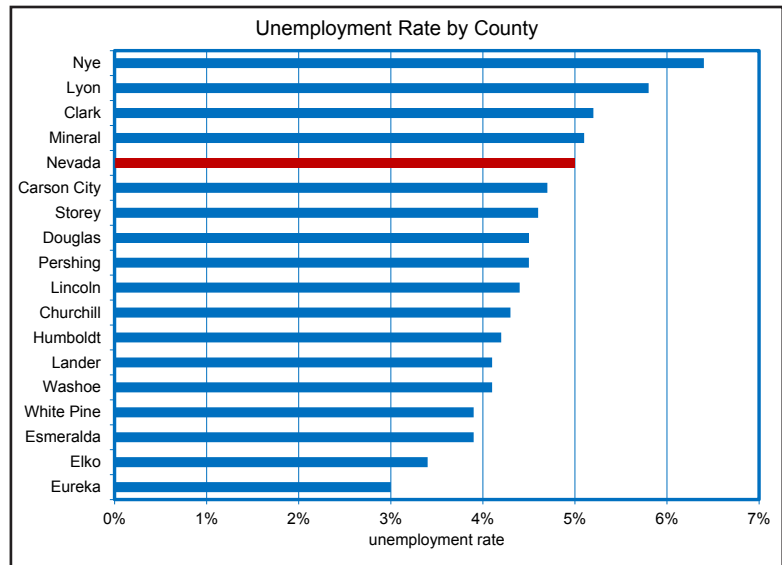

The results in Carson City are of interest, as just 42 percent the workforce actually lives there. Neighboring counties, including Washoe, account for more than half of the workforce.

All told, eight of the Silver State's counties have less than half of its workforce living in the county, the lowest being Storey County with less than six percent. Specifically, less than 200 of Storey's 3,400 workers live within the County. These findings suggest that, in general, commuting patterns are a function of where the jobs are, and where residential opportunities exist.

Initial claims for unemployment insurance (UI) at the county level continue to reflect the declines seen on the Statewide level. Through August, initial claims

are down in all but one of Nevada's counties compared to the same months last year. The largest nominal declines have come in Nevada's largest counties, with Clark falling by 3,280 claims and Washoe falling by 935 claims compared to last year's total. Twelve of Nevada's counties have seen claims fall by ten percent or more. Storey County continues to be the only county that has seen an increase in claims from last year.

Unemployment rates were down in all of the State's major population centers, both on a month-over-month and year-over-year<sup>2</sup> basis in August. In Las Vegas the unemployment rate is at 5.2 percent, down 0.2 percentage point from July, and down 0.5 percentage point from August of last year. Reno's unemployment rate is at 4.1 percent, down 0.1 percentage point from July and down 0.6 percent-

age point from last year. The unemployment rate in Carson City dropped 0.2 percentage point over the month to 4.7 percent, a decline of 0.9 percentage point over the year.

Unemployment rates have declined on a over-the-year basis in all 17 of the State's counties this month. Rate declines ranged from 1.7 percentage points (Eureka) to 0.4 percentage point (White Pine). All counties remain below seven percent unemployment in August. Eureka, at three percent, is home to the State's lowest unemployment rate. Esmeralda, White Pine, and Elko (all below four percent) also maintain relatively low unemployment rates. Nye, at 6.4 percent, has the highest unemployment rate in the Silver State, followed by Lyon at 5.8 percent.

Year-to-date online job posting activity is up in 14 of 17 counties in August<sup>3</sup>.

Online Job Posting Activity by County			
	August 2017 (Year-to-Date)		Change
	2017	2016	
Elko, NV	4,586	3,721	865
Douglas, NV	3,102	2,466	636
Nye, NV	1,987	1,417	570
White Pine, NV	1,193	791	402
Lyon, NV	1,908	1,594	314
Lincoln, NV	400	232	168
Mineral, NV	521	371	150
Humboldt, NV	1,210	1,085	125
Clark, NV	103,241	103,123	118
Esmeralda, NV	199	95	104
Lander, NV	350	271	79
Pershing, NV	260	183	77
Storey, NV	104	80	24
Carson City, NV	5,508	5,491	17
Eureka, NV	169	176	-7
Churchill, NV	1,580	1,772	-192
Washoe, NV	24,141	26,842	-2,701

<sup>2</sup> The State's seasonally adjusted unemployment rate is 4.8 percent in July, up from 4.7 percent in June and down from 5.6 percent in July 2016. Unemployment rates for the State's metropolitan areas and counties reported here are not adjusted for seasonality. Hence, comparisons to the State's seasonally adjusted rate should be avoided. Legitimate comparisons, however, can be made to the State's unadjusted rate - 5.1 percent in July, up from 4.9 percent in June and down from 5.8 percent in July 2016.

<sup>3</sup> Online job postings are obtained through DETR's Silver State Solutions initiative. Online job posting volume does not necessarily correlate with the level of job openings or hiring. Internal company hiring and union hiring are often not captured by online ads. High ad volume often occurs for occupations/industries that are having difficulty finding qualified candidates, high turnover positions/recurring openings, or when companies are building large candidate pools. Online job postings should only be used with caution when developing/analyzing time series trends due to the constant changes in the rate of online advertising usage and in the methods used for collecting the data.

Elko (+870), Douglas (+640), and Nye (+570) experienced the largest increases in ad volume over last year. There have been 103,200 online job ads so far in 2017 for positions in Clark County, resulting in an increase (+120) over this time last year. Washoe has experienced the greatest decline in job postings, with 2,700 less ads than in August last year. Carson City has realized an increase (+20) of ads over last year, totaling 5,500 through August 2017.
