Job Growth Ranking
Dionny McDonnell, Economist

Note: 2016:18
June 8, 2016

Nevada has Third-Highest Private Sector Job Growth in the U.S. states with private sector job growth less than Nevada

- Information obtained through the Quarterly Census of Employment and Wages (QCEW) Program provides a nearly complete job count based upon quarterly wage records submitted by employers whose employees are covered under the Unemployment Insurance System. Because generating this information is a time-consuming process, it is only available with a 4-5 month lag. These data represent a complete count of jobs based upon information submitted by covered employers. As a result, historical information is subject to minimal, if any, revisions.
- Examining this information over time, and for all 50 states (plus the District of Columbia), highlights Nevada's relative performance during the pre-recession boom, through the downturn, and into the recovery.
- In the years preceding the economic downturn, Nevada led the country in private sector employment growth. Indeed, Nevada had the highest employment growth rate in the country in 2005 (6.4 percent).
- Conversely, during the recession, Nevada was the most affected state in terms of private sector employment growth. In fact, Nevada's employment growth was the lowest in the nation in 2009 (-10.1 percent) and 2010 (-2.8 percent).
- Nevada has gradually regained lost ground over the past four years. In 2011 the private sector grew at a rate of 1.2 percent, 37th in the nation; in 2012 we grew at a rate of 1.9 percent, 27th in the nation; and in 2013, private sector growth continued this trend, growing at 2.7 percent, which placed it 13th in the nation. In 2014 Nevada had the second-fastest growing private sector in the nation, with a four percent growth rate.
- With data through 2015, we see that Nevada had the third-fastest growing private sector in the nation, with a 3.8 percent growth rate. Utah and Florida had slightly higher growth rates, at 4.3 percent and 4.1 percent, respectively.
