Refined Gold, Computer/Electronic Products and Gaming Equipment are Nevada's Largest Export Products

- Information from the Census Bureau's Foreign Trade Division shows Nevada's top export product is primary metal manufactures (e.g., refined gold). In 2016 this product represented 51% of the State's total exports (\$9.7 billion), at five billion dollars.
- Exports of computer and electronic products totaled \$1.6 billion, 17 percent of all exports.
- Miscellaneous manufactured products (e.g., gaming equipment) were Nevada's third largest export accounting for 12 percent (\$1.15 billion) of total exports.
- Other top exports included: mineral and ores (\$383 million), machinery (\$257 million), food manufactures (\$217 million), chemicals (\$211 million), transportation equipment (\$210 million), electrical equipment (\$198 million), and fabricated metal products (\$140 million).
