Number of Employers in Nevada Hits Another Record High; 25 Consecutive Quarters of Year-over-Year Growth

- The number of employers in the Nevada unemployment insurance system totaled just over 69,300 during 2017:IIIQ, increasing by 390 employers, or 0.6 percent, from 2017:IIQ. This is the 11th time in the past 12 quarters that the Silver State has established a new record high.
- On a year-over-year basis, employer counts in Nevada increased by 2,300, or 3.5 percent. This is the 25th consecutive quarter of year-over-year growth.
- From the recessionary low of 56,000 employers, Nevada has seen the number of employers grow by 13,300, a 23.8 percent increase.
- Employer totals are now 8,700, or 14.4 percent, higher than they were at the pre-recession peak, further evidence that Nevada's labor market has fully recovered from the impacts of the downturn, though additional room remains for improvement.
