Gross Job Gains vs. Gross Losses – All Establishments
Marianne Segurson, Economist

Note: 2017:55
May 3, 2017

Nevada Private Sector Gross Job Gains > Gross Job Losses in 24 Straight Quarters; 2016:IIIQ Net Gain = 14,300 Jobs

- Business Employment Dynamics (BED) data enhances labor market perspective by delving beyond net employment changes into the sources of movement – job creation and destruction.
- Gross job gains at expanding or opening private sector establishments totaled 76,100 in 2016:IIIQ. Gains have trended higher at a modest, but consistent, pace since the beginning of the recovery. Over the same period, gross job losses at contracting or closing private sector establishments totaled 61,800.
- The difference between the number of gross job gains and the number of gross job losses equated to a “net” employment gain of 14,300 jobs in the private sector. That translates into the second-strongest gain since before the recession.
- This represents the 24th-consecutive quarter of net job growth, based upon BED measures.
- Gross job losses have been hovering near pre-recession levels of late. As a result of several years of improvement, gross job gains appear to be approaching pre-recessionary levels. In fact, gross gains in 2016:IIIQ were the highest since the first quarter of 2008.
