County Job Growth 2018:IIQ
Tim Wilcox, Economist

Note: 2018:143
December 4, 2018

13 of 17 Counties Experienced Job Growth; Storey County Surging at 60% Growth; Silver State Grows by 3%

- In the Quarterly Census of Employment and Wages (QCEW) Program, the Research and Analysis Bureau collects and compiles employment and wage data for workers covered by Nevada unemployment insurance laws, and federal civilian workers covered by Unemployment Compensation for Federal Employees.
- The most recent QCEW information shows that total employment in Nevada as a whole increased 3.2 percent during this year's second quarter, relative to the same period in 2017. This translates into a gain of more than 42,000 jobs
- Job growth ranged from -19% in Esmeralda County to 60% in Storey County. In the former, this is most likely due to a loss in mining jobs over the year. In the latter, 6,300 new jobs were generated over the year, leaving employment at 16,800. Manufacturing leads the way accounting for nearly all of the growth in employment.
- As for Nevada's major population centers, Clark County, at 2.9 percent, falls slightly below the Statewide average. Washoe County also experienced a growth rate slightly lower than that for the Silver State, at 2.5%. Finally, Carson City experienced a 0.4% growth rate.
